drinktec 09

Visit us in Munich

The exhibition "drinktec 2009" is one of the most important investment fairs in the beverage industry. It takes place from the 14th to 19th of September in Munich. 1500 exhibitors from the areas of beverage ingredients, technologies, logistics and marketing have confirmed their attendance. The drinktec expects up to 70,000 visitors.

This year we are very proud to present to you an extensive range of interesting products at the drinktec. We will be exhibiting newly developed innovations for

the cooling and dispensing equipment segment. Starting with beer dispensing systems and stylish fonts for softdrinks, we will include water and juice dispensers for use in the health and wellness field and demonstrate a good cross-section of our portfolio. To offer visitors a comprehensive picture of our products most devices will be in use. This will convey to those interested - in addition to the visual impression - a convincing on the spot insight of performance and functionality.

You will find us in Hall A1, Booth 309

Our highlights for this year's exhibition

New Age Drink Generation

Viper

Exciting flavours - enjoy them frozen

Flavor Fusion

Gives aroma to different types of soft drinks by adding any desired additional flavour

Signature

Serves frozen drinks, milk and fruit shakes, as well as coffees and cocktails

Icy Shot

Is designed for 3 products with high alcoholic content and chills schnapps drinks from room temperature down to as low as -16°C. This means that the drink doesn't require any previous cooling. The spirit flows directly from the bottle into the glass, with down to -16°C, fully portioned and without any delay. A genuine eye catcher!

Health and wellness: Our water and juice dispensers

AquaTower series

At the push of a button it provides you with chilled still or carbonated water

Vitalize

Offers 2 juices selected from any range of syrup containers, as well as chilled table water

Quest Coffee dispenser

Refreshes tired minds with ice cold coffees of different flavours

The water dispenser line

Pearlmax3 Flavor

Dispenses carbonated or still water with different flavours, if desired

Selecta Seattle

Here, you'll get carbonated or still, chilled or unchilled water

AquaDis

Our new water dispenser, capable of dispensing both cold and hot water

Innovations/ Green range
IntelliBlue3 Green Propan

Energize5 Green CO₂

CR70

This year, we will present our new soda circuit product range, the Energize and the IntelliBlue model with environmentally friendly and natural refrigerants, like with CO₂ and propane. This means that they now work even more environmentally friendly than before. Of course, you can also check out our built-in diagnostics system including an integrated GPRS device.

We have successfully tested one of our water bath coolers, the CR70 model, with an alternative refrigerant, and will present it in this version to a wider audience for the first time, this year.

smartDRAFT family

smartDRAFT Tropical

smartDRAFT MAX

smartDRAFT mini

All members of the smartDRAFT product family use the specific 10l keg with integrated CO₂ chamber as well as the one-way beer line, which makes the cleaning of the system redundant. But the individual products differ in the type of cooling system and in size. While the smartDRAFT Tropical model has an integrated cooling system and a specific insulation, the smartDRAFT mini can work without any active cooling and keeps a keg chilled for 6-8 hours just by its special insulation. The prerequisite is that the keg has been well chilled beforehand. The smartDRAFT MAX is capable of cooling four kegs at a time, and can thus also be used for large demands in beer.

Additionally we will present you with examples of alternative opportunities of use. We can provide you for instance with freshly drafted prosecco or wine directly from our smartDRAFT.

Beer and soft drink towers

Nueva Style Coca-Cola

Nueva Style Pepsi

Midas incl. BarGun

Our Nueva Style combines perfect draught technology with an aesthetic design. Whether with a taxi sign or an integrated LCD monitor, thanks to its changeable external design it always is a perfect advertising medium. Simply an eye catcher!

We will show our Midas together with our new BarGun. This new product will allow you to serve a large number of different products on the highest possible level.

UltraFlow

Our classic amongst the quick draught systems: 0.5 l of beer in less than 5 seconds.

TwinIce

TwinIce puts the frozen head on top of your beer, one that only consists of the pure product - and no longer diluted.

Automatic keg changer

Provides for an uninterrupted flow of beer. No interruptions caused by an empty barrel of beer will occur during operation.

Small parts and spare parts

Keg heads

3D Fish Eye ads medium

Novelties in the Parts range
